Jakarta Barat, Indonesia

Analytical and business-driven professional with experience in product design, cross-functional collaboration, and data-informed decision making. Proven ability to translate user needs into solutions that drive engagement and revenue growth. Seeking an opportunity to develop strategic, operational, and leadership capabilities in a fast-paced organization.

Work Experiences

Siloam Hospital - Karawaci

Apr 2025 - Present

UI/UX Designer (Mid-Level)

- Led the revamp of the medication administration system used by healthcare professionals, redesigning workflows across doctors, pharmacists, and nurses to create a fully integrated medication process.
- Improved operational transparency and reduced the risk of insurance picking list inflation and medication errors through standardized digital workflows.
- Collaborated with clinical, product, and engineering teams to align system design with hospital operational needs and patient safety standards.
- Designed the integration of medical data capture devices for anesthesia in operating rooms to ensure accurate and secure recording of procedural data.
- Improved data accuracy and traceability for anesthesia in operating room workflows by eliminating manual or inconsistent data entry.

Alodokter - South Jakarta

Jun 2023 - Mar 2025

UI/UX Designer (Mid-Level)

- Led the integration of Biteship shipment system, reducing courier unavailability from 75% to below 10%, improving operational efficiency.
- Initiated a gamified point redemption system that increased e-course and webinar revenue by 10 - 20%
- Implemented autoplay media feature that increased Forum Discussion engagement by 30 - 40%
- Standardized media upload ratio and optimization, improving user interaction by 40 - 50 %
- Designed an optimized registration experience for medical students, incresing webinar participation by 30 %
- Introduced a leaderboard-based engagement system to strengthen community participation and retention.
- Revamped Channel Landing Page to improve content discovery and sponsored content visibility.
- Collaborated closely with cross-functional teams (product, engineering, marketing) to launch a specialized health platform for medical professionals.

Transfez - South Jakarta

Feb 2023 - May 2023

UI/UX Designer Intern

- Conduct competitive analysis across five international platforms to identify design and usability opportunities.
- Designed end-to-end website concepts with nine distinct user interaction flows.
- Worked closely with product managers and marketing teams to align design solutions with business and branding goals.
- Collaborated with UX writers to develop clear and conversion-oriented microcopy that improved user readability and engagement.

PT Vidio Dot Com - South Jakarta

Aug 2022 - Dec 2022

Product Design Intern

- Collaborated with product managers, engineers, and design system teams to improve subscription and user account experiences.
- Proposed five promotional voucher concepts to support package purchase strategies.
- Conducted user interviews to redesign profile menu structure for better usability.
- Delivered 10+ design case improvements across mobile and desktop platforms.
- Integrated GoPay payment flows across multiple product interfaces.
